01 THE SYSTEM

# One campus. One shared view.

CheckedIn connects campus events with clear, verifiable attendance—from publishing an event to recognizing the people who joined.

### For students

Find events, check in, follow attendance, and earn participation rewards in the mobile app or student portal.

### For campus teams

Publish events, set attendance rules, monitor arrivals, and review participation from the staff workspace.

**Less friction at the door. Better insight after the event.**

Built for students, faculty, organization teams, and campus administrators.

02 PRIVACY & ACCESS

# Designed for accountable access.

Each person signs in to the right workspace. Role-based permissions help keep student and event records available only to authorized users.

**Student app & portal**
Event discovery, attendance, history, and rewards

↓

**CheckedIn services**
Sign-in, permissions, verified check-in, and live updates

↓

**Staff workspace**
Event setup, live monitoring, and reporting

**Location, camera, or photo checks?**

They are used only when the event's attendance settings require them. Follow the in-app prompt and your campus guidance.

The platform uses secure sign-in, protected records, and campus-defined access. Never share your password or a live event OTP.

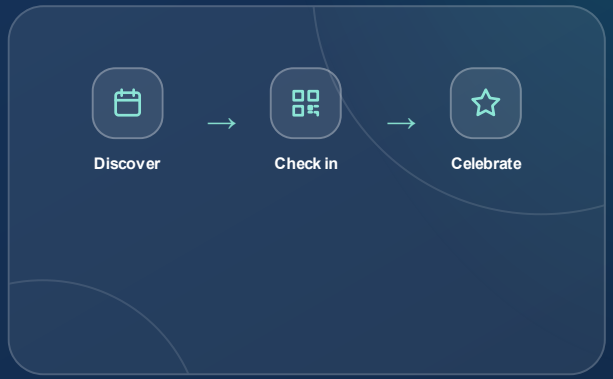

Questions about an account or event? Contact your campus administrator or event organizer.

CheckedIn

CAMPUS EVENTS, CONNECTED

# Show up. Check in. Get recognized.

A quick-start guide to CheckedIn for students and campus teams.

Events, attendance, and student engagement—in one campus-ready system.

STUDENT MOBILE APP · STUDENT WEB · STAFF WORKSPACE

QUICK START · USER GUIDE

03 STUDENT QUICK START

## Your campus life, in your pocket.

Use the CheckedIn mobile app or open your campus student portal in a browser.

1. **Sign in or register.** Use your campus account. Complete any requested identity and email verification.
2. **Explore events.** Browse published events and open one to review its time, venue, and check-in window.
3. **Check your progress.** Visit your profile for attendance history, reward points, and earned badges.

### Use the bottom navigation

Home, Events, Scan, Bingo, and Profile are one tap away. Notifications are in the top bar.

**Need access?** Ask your campus administrator or organization for the official student app and portal links.

STUDENTS · START WITH YOUR CAMPUS ACCOUNT

04 EVENT CHECK-IN

## A clear path from QR to done.

Check-in is tied to the event and its attendance window. Keep the app open and follow each prompt.

1. **Open Scan.** Choose Scan in the app or student portal and allow camera access when asked.
2. **Scan the event QR.** Use the code displayed by the organizer. Check that you selected the right event.
3. **Complete required checks.** Depending on the event, confirm your location, enter the organizer's current OTP, or take a selfie.
4. **Wait for confirmation.** Look for a successful check-in message; review your history later in Profile.

### Offline on mobile?

If offline attendance is available, a submission is saved on your device and waits to sync when connectivity returns. It may need staff review before it is confirmed.

If a scan fails, check the event's time window and follow the on-screen instructions. Ask the organizer for help—never reuse an expired OTP.

05 STAFF QUICK START

## Set up. Monitor. Learn.

The staff workspace brings event operations and campus participation into one place.

1. **Sign in to Staff.** Use the account and role granted by your administrator.
2. **Publish an event.** Organization teams add its details, venue, schedule, attendance window, and required checks.
3. **Share the check-in.** Display the event QR and, when configured, the current OTP for attendees.
4. **Monitor and review.** Use Live Monitor for arriving check-ins; review reports and engagement after the event.

### Organization teams

Create and manage their events and participation activities.

### Faculty

Use the campus tools enabled for their assigned role.

### Administrators

Oversee campus users, access, and platform operations.

**Before doors open:** confirm the event is published, the attendance window is correct, and the QR display is visible to attendees.
